4 reviews of Douglas Schwartz, DO "I started seeing Dr. Scvhartz after a spinal surgery. He's understanding and patient and was very helpful in the area of pain control. He is open to alternative therapies. His office is efficiently run, however the wait time is well over an hour - unless you grab the 8:30am appointment. I give the MD 5 stars, the staff 3 stars and the wait time 1 star."

She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cellsitaken without her knowledgebecame one of the most important tools in medicine: The first immortal human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb's effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta's family did not learn of her immortality until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks familypast and presentis inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks familyespecially Henrietta's daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn't her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, The Immortal Life of Henrietta Lacks captures the beauty and drama of scientific discovery, as well as its human consequences.

Many millennia later, Taiju frees himself from the petrification and finds himself surrounded by statues. The situation looks grim until he runs into his science-loving friend Senku! Together they plan to restart civilization with the power of science! The advent of the hot-air balloon introduces maps. And with more allies than ever, Senku and company start a food revolution to create tasty, long-lasting bread to feed everyone in the kingdom. Then, while testing their new motorboat in nearby waters, they intercept a shocking message!

Marion and Shiva Stone are twin brothers born of a secret union between a beautiful Indian nun and a brash British surgeon. Orphaned by their mother's death and their father's disappearance and bound together by a preternatural connection and a shared fascination with medicine, the twins come of age as Ethiopia hovers on the brink of revolution. Moving from Addis Ababa to New York City and back again, Cutting for Stone is an unforgettable story of love and betrayal, medicine and ordinary miraclesand two brothers whose fates are forever intertwined.
