Presenting a brand new approach to teaching consumer behaviour, Szmigin and Piacentini move beyond traditional psychological learning to acknowledge more holistic perspectives of consumer behaviour and incorporate new areas of research, such as Consumer Culture Theory, which are enhancing our understanding of this fascinating subject. The latest behavioural, psychological and sociological approaches are presented alongside emerging techniques, such as neuromarketing, with their application to marketing explicitly drawn out. Theory is firmly set in context for students through extensive use of international examples and extended cases on topics such as repertoire shopping in China, lifestyles of Indian consumers, and learning about brands through Havaianas in Brazil. Each chapter includes Consumer

Insights covering topics such as social media marketing in the Netherlands, repositioning Lucozade in the UK, and finding the right celebrity endorser. These features bring together the themes discussed and encourage students to engage with the material on a more practical level. Central to the book is the recognition of how businesses and government are likely to use knowledge of these theories and techniques in marketing strategies and business decision making. Each chapter includes a Practitioner Insight from a professional working in marketing, advertising, government or charity, including Dubit, Thinkbox and Age UK to provide real world views on the topics being discussed and the possible future direction of these areas. The authors acknowledge consumer behaviour as a research discipline. To reflect this, Research Insights features throughout each chapter include links to seminal papers to present students with the opportunity to take their learning further. The accompanying Online Resource Centre provides superior ready-to-use support for both students and lecturers: For students: * Author blog, responding to changes within the subject and supporting the currency of the textbook; * Web links illustrating consumer behaviour in practice including examples from print, video and web; * Multiple choice questions with instant feedback; * Links to seminal articles as highlighted in the Research Insights feature; * Web exercises to encourage students to test their knowledge and apply their learning; * Flashcard glossary to test understanding of key terms. For lecturers: * Comprehensive customizable PowerPoint slides; * Learning activities (including, more detailed workshop-based activities, shorter lecture-based in-class exercises and suggestions for assessment approaches) * An instructor's manual (containing guidance on how to use the case studies and Practitioner Insights in class, indicative answers, and some additional questions).

Winner of the 2015 Robert M. Stevenson Award from the American Musicological Society In *Representing the Good Neighbor: Music, Difference, and the Pan American Dream*, Carol A. Hess investigates the reception of Latin American art music in the US during the twentieth century. Hers is the first study to probe Latin American art music in relation to Pan Americanism, or the idea that the American nations are bound by common aspirations. Under the Good Neighbor policy, crafted by the administration of President Franklin D. Roosevelt to cement hemispheric solidarity amid fears of European fascism, Latin American art music flourished and US critics applauded it as "universal." During the Cold War, however, this repertory assumed a very different status. While the United States supported Latin American military dictators to assuage fears that communism would overwhelm the hemisphere, musical works were increasingly objectified through essentializing adjectives such as "exotic," "distinctive," or "national"--through the filter of difference. Hess explores this phenomenon by tracking the reception in the United States of the so-called Big Three: Carlos Ch?vez (Mexico), Heitor Villa-Lobos (Brazil), and Alberto Ginastera (Argentina). She also evaluates several important US composers and critics-Copland, Thomson, Rosenfeld, and others-in relation to Pan Americanism, and offers a new interpretation of a work about Latin America by US composer Fredric Rzewski, *36 Variations on "The People United Will Never Be Defeated!"* Whether discussing works performed in modern music concerts of the 1920s, at the 1939 World's Fair, the inauguration of the New York State Theater in 1966, or for the US Bicentennial, Hess illuminates ways in which North-South relations continue to inform our understanding of Latin American art music today. As the first book to examine in detail the critical reception of Latin American music in the United States, *Representing the Good Neighbor* promises to be a landmark in the field of American music studies, and will be essential reading for students and scholars of music in the US and Latin America during the twentieth-century. It will also appeal to historians studying US-Latin America relations, as well as general readers interested in the history of American music.

Noted logician discusses both theoretical underpinnings and practical applications, exploring set theory, model theory, recursion theory and constructivism, proof theory, logic's relation to computer science, and other subjects. 1981 edition, reissued by Dover in 1993 with a new Postscript by the author.

We say a lot about ourselves by what we don't say. Words and phrases like 'collateral damage', 'wardrobe malfunction', 'vertically challenged', and old favourites like 'unmentionables' (trousers, apparently) or 'lady of the night' - all are ways of not using particular words. UNMENTIONABLES is a rollicking exploration of the history of euphemistic usage, looking at how taboos connected to sex, death, religion, war, politics, business and matters of status have produced an extraordinary linguistic creativity, and how euphemistic speech has changed over the centuries. It looks at how euphemisms are born, and how they die (or 'experience a negative outcome') and it explores why it is that we create euphemisms, and the different purposes - from the benign to the sinister - that they serve. (Is 'euphemism' a euphemism for lying?) Lively, entertaining, and crammed with fascinating nuggets of information, UNMENTIONABLES is a celebration of the richness of language. Why have just one word for something when you can have ten other words instead?

In *War, Wine, and Taxes*, John Nye debunks the myth that Britain was a free-trade nation during and after the industrial revolution, by revealing how the British used tariffs--notably on French wine--as a mercantilist tool to politically weaken France and to respond to pressure from local brewers and others. The book reveals that Britain did not transform smoothly from a mercantilist state in the eighteenth century to a bastion of free trade in the late nineteenth. This boldly revisionist account gives the first satisfactory explanation of Britain's transformation from a minor power to the dominant nation in Europe. It also shows how Britain and France negotiated the critical trade treaty of 1860 that opened wide the European markets in the decades before World War I. Going back to the seventeenth century and examining the peculiar history of Anglo-French military and commercial rivalry, Nye helps us understand why the British drink beer not wine, why the Portuguese sold liquor almost exclusively to Britain, and how liberal, eighteenth-century Britain managed to raise taxes at an unprecedented rate--with government revenues growing five times faster than the gross national product. *War, Wine, and Taxes* stands in stark contrast to standard interpretations of the role tariffs played in the economic development of Britain and France, and sheds valuable new light on the joint role of commercial and fiscal policy in the rise of the modern state.

This literary study is an exploration and a celebration of a writer who for the last half century has been at the forefront of modern African writing. Since the publication of *Things Fall Apart* in 1958, Chinua Achebe has been credited with being the key progenitor of an African literary tradition and his five novels read as tracing the national narrative of Nigeria. Achebe depicts precolonial societies disturbed by British colonization, in the 1890s and the 1930s, the dog days of colonization in the 1950s, Independence in 1960 and the onset of neo-colonial problems of corruption and civil war and, in his final novel, *Anthills of the Savannah* (1987), the pervasive sense of postcolonial disenchantment. This study casts back over Achebe's writing career to assess his considerable contribution to postcolonial writing and criticism, including his Editorship of Heinemann's acclaimed African Writers Series which has shaped African literature for international audiences since 1962. Yousaf's examination of A
