This book, now in its Second Edition, continues to provide a comprehensive and coherent discussion of environmental economics. The text begins with an overview of the interdependence of economics and the environment. It then focuses on the theories and concepts from mainstream economics and describes how they are applied to environmental issues. The book discusses in detail the issues of market failure, externality and welfare with regard to the environment. It also analyzes population dynamics and its relationship with the environment. The concepts and issues related to natural resources economics and valuation of environmental resources as important part of environmental economics have been dealt with. Finally, the book presents important national and international environmental issues and legislations. The book is specially designed for the undergraduate and postgraduate students of economics. NEW TO THIS EDITION The most obvious change in this second edition is the new chapter entirely focussing on the interaction between economy and environment using the material balance model and examining the nature of environmental problems. It focuses on applying the principles of welfare economics to environment and its role in decision making relating to environmental resource use. KEY FEATURES | Discusses various real-life environmental issues for better understanding of the theory. | Provides a list of assignment topics to encourage the students to gain practical knowledge. | Includes a glossary containing important terms.

Sports economics is a relatively new field of research that is experiencing rapid growth in the economics literature. The importance of the sports industry to economies coupled with the availability of financial and productivity data have made the study of sports economics a useful avenue for exploring research questions that have eluded mainstream economics fields. The main goal of this Special Issue of the International Journal of Financial Studies is to encourage theoretical and applied research in sports economics, which is of interest to both academics and practitioners. For this purpose, this Special Issue on |Sports Finance| invites papers on topics, such as, but not limited to, salary determination, ticket pricing, revenue sharing, salary caps, competitive balance, new stadium financing, rival league behavior, determinants of revenue, television and media, tournament prize structures, financial distress in professional sports, financial fair play, financial control of sports clubs, Third Party Ownership, financial efficiency in professional sports, budget constrains and sport performance, financial information of sports, ownership of professional sport clubs and Crowdfunding in sports. Papers on both professional and amateur sports are welcome.

!Meet Dr Sabeel, and the distinctive family members of Geeta Sadan from the neo modern small town of Patna. An upper middle-class nuclear family with incessant, pertinent middle-class issues. The eldest grown-up daughter who stays secluded, unmarried, the second daughter who's guileless, eager to marry and the youngest daughter who's too boisterous to marry and settle down. A son who's the youngest and too busy cracking jokes and a mother who's straight out of an Indian daily soap, struggling with the side effects of menopause and the pressure of marrying off three daughters. This clan will tug your heart strings with emotions of love, laughter, sorrows, and joy. So come and meet them today at Patna- 800020, as a gripping family drama unfolds.

When firms and people are located near each other in cities and in industrial clusters, they benefit in various ways, including by reducing the costs of exchanging goods and ideas. One might assume that these benefits would become less important as transportation and communication costs fall. Paradoxically, however, cities have become increasingly important, and even within cities industrial clusters remain vital. Agglomeration Economics brings together a group of essays that examine the reasons why economic activity continues to cluster together despite the falling costs of moving goods and transmitting information. The studies cover a wide range of topics and approach the economics of agglomeration from different angles. Together they advance our understanding of agglomeration and its implications for a globalized world.
