An essential manual for beginners and senior researchers alike For academic medical faculty unfamiliar with national and international regulations, the prospect of initiating and managing a clinical trial can be intimidating. The development of protocols and case report forms, compliance with regulatory requirements, the monitoring of clinical trials as well as the responsibilities of documentation are just some of the tasks the sponsor-investigator is faced with. This book covers the entire spectrum of a clinical trial, reviewing the different stages step by step: financial planning, crucial aspects of trial design, the authorization process and, finally, documentation. Moreover, it contains helpful tips, a practical glossary, instructions and a large number of resources related to the relevant regulations and forms conforming to the International Conference on Harmonization and Good Clinical Practice'. This makes the publication at hand an essential cookbook' for both academic faculty new to clinical trials as well as seasoned sponsors-investigators.

Ten Strategies of a World-Class Cyber Security Operations Center conveys MITRE's accumulated

expertise on enterprise-grade computer network defense. It covers ten key qualities of leading Cyber Security Operations Centers (CSOCs), ranging from their structure and organization, to processes that best enable smooth operations, to approaches that extract maximum value from key CSOC technology investments. This book offers perspective and context for key decision points in structuring a CSOC, such as what capabilities to offer, how to architect large-scale data collection and analysis, and how to prepare the CSOC team for agile, threat-based response. If you manage, work in, or are standing up a CSOC, this book is for you. It is also available on MITRE's website, www.mitre.org.

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

For many years it has been recognized that the key to explaining the production of the Bible lies in understanding the profession, the practice and the mentality of scribes in the ancient Near East, classical Greece and the Greco-Roman world. In many ways, however, the production of the Jewish literary canon, while reflecting wider practice, constitutes an exception because of its religious function as the written "word of God", leading in turn to the veneration of scrolls as sacred and even cultic objects in themselves. "Writing the Bible" brings together the wide-ranging study of all major aspects of ancient writing and writers. The essays cover the dissemination of texts, book and canon formation, and the social and political effects of writing and of textual knowledge. Central issues discussed include the status of the scribe, the nature of 'authorship', the relationship between copying and redacting, and the relative status of oral and written knowledge. The writers examined include Ilimilku of Ugarit, the scribes of ancient Greece, Ben Sira, Galen, Origen and the author of Pseudo-Clement.

Completely revised and updated, the Manual of Drug Safety and Pharmacovigilance, Second Edition is a how-to manual for those working in the fields of drug safety, clinical research, pharmacology, regulatory affairs, government and legal professions. This comprehensive and practical guide discusses the theory and the practicalities of drug safety (also known as pharmacovigilance) and side effects, as well as providing essential information on drug safety and regulations, including: recognizing, monitoring, reporting and cataloging serious adverse drug reactions. The Manual of Drug Safety and Pharmacovigilance, Second Edition teaches the ins and outs of drug safety in the industry, hospitals, FDA, and other health agencies both in the US and around the world, and presents critical information about what is done when confronted with a drug safety problem. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

This is the fourth National Statistics annual report which highlights the variety of work carried out by statisticians and other analysts in the Government Statistical Service (GSS) during the year 2003-04. It considers the progress made in implementing the statistical plans set out in the National Statistics Work Programme for 2003/04 to 2005/06, across three main areas of work: major developments in cross-cutting departmental or theme boundaries; work carried out under the aegis of the 12 National Statistics Theme Groups; and quality improvements carried out in the context of the National Statistics Quality Review Programme.

Congress has promoted fisheries science for over a century and its involvement in fisheries management took a great leap forward with passage of the Fisheries Conservation and Management Act of 1976. In the past decade, Congress has requested advice from the National Research Council (NRC) on both national issues (e.g., individual fishing quotas and community development quotas) and the assessments related to specific fisheries (Northeast groundfish). This report was produced, in part, in response to another congressional request, this time related to the assessments of the summer flounder stocks along the East Coast of the United States. Following the initial request, the NRC, National Marine Fisheries Service (NMFS), and congressional staff agreed to broaden the study into a more comprehensive review of marine fisheries data collection, management, and use.
