Effective school leadership depends on developing an understanding of people, organisational learning and organisational processes. However, each school has a unique set of circumstances. Prescriptions for leadership that apply to one school may well not apply to another. Individual Schools, Unique Solutions turns away from the highly prescriptive management practices that often fail to provide a workable solution to specific problems in schools. Adrian Raynor demonstrates that by understanding the process influencing any situation, a creative solution can be achieved. The book draws on systems theory and aspects of complexity theory. While addressing many of the issues commonly faced by headteachers, the principles described are equally important for all levels of school

(KDD). It focuses on the feasibility, usefulness, effectiveness, and scalability of techniques of large data sets. After describing data mining, this edition explains the methods of knowing, preprocessing, processing, and warehousing data. It then presents information about data warehouses, online analytical processing (OLAP), and data cube technology. Then, the methods involved in mining frequent patterns, associations, and correlations for large data sets are described. The book details the methods for data classification and introduces the concepts and methods for data clustering. The remaining chapters discuss the outlier detection and the trends, applications, and research frontiers in data mining. This book is intended for Computer Science students, application developers, business professionals, and researchers who seek information on data mining. Presents dozens of algorithms and
